## Tau Lepton Physics

*Wednesday, July 19, 2023 9:00 AM (45 minutes)*

Precise measurements of the lepton properties provide stringent tests of the Standard Model. The large mass of the tau makes also possible to perform accurate QCD studies and search for violations of lepton flavour in many kinematically-allowed decay modes. The present status of tau physics and the prospects for future improvements will be discussed.

### Consent

I consent to recording/broadcasting my presentation.
