Rare leptonic and semileptonic charm decays at LHCb

Thursday, July 20, 2023 9:45 AM (45 minutes)

LHCb is playing a crucial role in the study of rare and forbidden decays of charm hadrons, which might reveal effects beyond the Standard Model. This talk presents the latest searches for and measurements using rare charm decay processes with leptons in the final state.

Consent

I consent to recording/broadcasting my presentation.
