11th International Workshop on Charm Physics (CHARM 2023)

Contribution ID: 40

Type: invited plenary talk

D mixing, indirect CPV and charm hadron lifetimes

Monday 17 July 2023 17:30 (30 minutes)

LHCb has collected the world's largest sample of charmed hadrons. This sample is used to measure $D^0 - \overline{D}^0$ mixing, search for CP violation in mixing and interference and measurements of charm-baryon lifetimes. New measurements from several decay modes are presented, as well as prospects for future sensitivities.

Consent

I consent to recording/broadcasting my presentation.
